Leonard Wholesale Sustainability Practices

Leonard Wholesale has committed to becoming a sustainable company that's adaptable to any and all market changes. We conduct our business in a responsible fashion, sensitive to the social and ecological environments.

Food

We are a strong supporter of locally grown Ontario produce.

We work with reputable farmers and growers who use governed agricultural methods.

All products entering our facility must meet "Quality Assurance" guidelines.

Operations

All of our delivery vehicles are equipped to reduce fuel consumption and CO2 emissions, and employ automatic engine shut off switches to limit idling time.

We plan our daily routes efficiently in order to reduce kilometres driven as much as possible.

Environment

We encourage our personnel to be both energy and water use conscious.

Our packaging and boxes contain recycled fibers and materials, and the office paper used is 100% recyclable.

Community

We deeply value diversity as this type of workplace offers differing perspectives, making our business stronger and more competitive.

We are a responsible corporate citizen that regularly donates to non-profit organizations, religious and educational institutions, and local food banks.

Leonard Wholesale believes in protecting and preserving the environment, conserving natural resources, and preventing pollution. Working together, we continually strive to make the world a better place for our children.

Anthony Bondi,

Owner, Leonard Wholesale
